

# GET Glowing SKIN

Perfect if:

- You have acne
- Sensitive skin
- Mature skin
- Enlarged pores

## Why exfoliate your skin?

Exfoliation helps many skin problems as it increases blood circulation and helps to achieve healthy and glowing skin.

Few things can make your skin look as good as a proper exfoliation. However, many scrubs are harsh on the skin, leaving it red and sensitive. Annique's new **Enzymatic Exfoliator** uses enzymes derived from tropical fruit, such as pineapple and papaya, to break down the protein in your skin and get rid of your dead and dull skin cells. Get glowing skin with Annique!

## HOW DOES IT WORK?

**Essense Enzymatic Exfoliator** is a gentle, yet effective exfoliating formula that speeds up the skin's natural exfoliation process, enhancing the penetration of treatment products.

It harnesses the mighty power of tropical fruit, enriched with extracts of papaya, pineapple, mango, banana and spondias mombin to gently stimulate exfoliation, resulting in improved skin radiance and luminosity as well as diminishing wrinkles and fine lines.

This exfoliator also contains gentle, environmentally friendly bamboo beads, an effective mechanical exfoliator that helps to remove dead skin cells, oil, dirt and other impurities.

It is also enhanced with Annique's exclusive Green Rooibos extract, known for its skin-soothing and antioxidant benefits.

## BENEFITS:

- Gently speeds up the skin's natural exfoliation process
- Enhances the penetration of treatment products
- Diminishes wrinkles and fine lines.
- Promotes brighter, younger and healthier looking skin
- Restores radiant luminosity to the complexion

Check out the Document section on the Webstore to see the difference between the Crème and new Enzymatic exfoliators.

### Suitable for:

*Sensitive skin: use once per week.*

*Other skin types: use two or three times per week.*

*(Highly recommended for people who struggle with clogged pores, blackheads & whiteheads)*

### Application

*Apply a thin layer directly onto clean, wet skin with wet hands to activate the enzymes, taking care around the delicate eye area.*

*Leave on for 3 to 5 minutes before rinsing off with water or Rooibos tea.*

*Enzymes are much gentler than scrubs and most enzymes also have anti-inflammatory properties that soothe irritation, so they're great for sensitive skin.*

*Enzyme exfoliators need to be stored in a cool, dry and dark place.*
