

A quality eye cream is a crucial part of any skin care routine, and sadly many of us learnt this lesson the hard way. But, it's never too late to soften those fine lines around the eyes and look years younger.

Bye-Bye EYE LINES!

Pesky fine lines and crow's feet making you look older than you are? You need a proper eye cream – you can thank us later...

What to look for in a super effective eye cream

1 Potent wrinkle-fighting active ingredients

Let's face it, wrinkles are nasty little things. You need state-of-the-art ingredients to tackle the problem.

VNA10+

- A natural extract from the Mexican 'Skin Tree'
- Helps to nourish, repair and restore skin

Ampsyncol III™

- Helps build collagen to soften wrinkles
- Strengthens the skin

Rooibos Extract

- Contains potent antioxidants that fight ageing and help you look years younger
- Hypoallergenic

2

A fragrance-free formula

Fragrance can often cause allergies and burn your pretty lookers. Eye Therapy does not contain any fragrance that may lead to watery, irritated eyes.

3

Suitable for all skin types

Eye Therapy contains natural ingredients making it suitable for all skin types.

Additionally, it is non-greasy, which means it also absorbs instantly.

Benefits:

- Food for your delicate eye area
- Minimises wrinkles and fine lines around the eye area
- Prevents ageing around eye and mouth area
- Can also be used around the lip area
- Improves the production of collagen, enhancing skin density
- Fragrance free

TOP TIP

Start using Eye Therapy in your 20s, to help prevent the first signs of wrinkles.

"Forever Young Eye Therapy works miracles. I started seeing fine lines (signs of crow's feet) around my eyes shortly after my 30th birthday. Within 1 to 2 months of using the Forever Young Eye Therapy I noticed a considerable change in the skin around my eyes. It looked firm and plump, and the fine lines started looking less noticeable. I have been using the Forever Young Eye Therapy for a year now. Those first signs of crow's feet are gone. My eye area looks amazing."

– Nikita Adonis

Recommended for

- Crow's feet
- Lines around the mouth
- Preventing ageing around eye area
- Stimulating collagen III production

DID YOU KNOW?

As the skin around your eye is thinner, it is the first to show signs of ageing.
